F4UBCD

falconfour's ultimate boot cd 4.6

You like this facebook.com/F4UBCD
Save partition to image, copy partition, restore from image.
Works with non-Seagate drive, hold Alt and type T-O-K to bypass error.
This disc is free software. If you've paid for it, you've been swindled.

Choisir l'option «seagate discWizard» avec les touches fléchées du clavier.

Error

To use the product, at least one Seagate or Maxtor device should be installed in your system.

You can purchase an upgrade to Acronis True Image Home edition by visiting www.acronis.com/seagate or by clicking on the Powered by Acronis logos that appear in the task wizards of the Windows application.

OK

Maintenir «alt» appuyé et taper «t», «o» et «k».

Help

- Contents
- How to clone your disc drive
- How to partition and format your data drive
- How to make a bootable version of this software

Pick a Task

Pick a task you want to perform on the local computer.

- DiscWizard to confirm that the drivers for your new disc drives or controller cards are loaded and ready. The bootable media works best when the hardware interface types are the same since the bootable media cannot load new device drivers.
- Add New Disc: Add a new hard disc drive to your computer.
- Image Backup: Back up your hard disc.
- Image Restore: Recover the entire hard disc contents or restore individual files.

or Pick a Tool

- Wipe Disc

Ready Local Computer

Appuyer sur la touche «tab» jusqu'à ce que l'option «image backup» soit sélectionnée. Taper enter (ou retour à la ligne).

Create Image Backup Wizard

Welcome to the Create Image Backup Wizard!

This wizard will guide you through the process of creating a complete image backup of your hard disc. You can create an image of the entire hard disc or a specified partition.

Information about drive capacity
One gigabyte, or GB, equals one billion bytes when referring to hard drive capacity. This software uses information provided by the operating system to display capacity and volume size. The Windows file system uses a binary calculation for gibibyte or GiB (2 to the power of 30) which causes the abbreviated size to appear smaller. The total number of bytes on a disc drive divided by the decimal calculation for gigabyte or GB (10 to the power of 9) shows the expected abbreviated size. See this [FAQ](#) for more information.

Maintenez «alt» appuyé et tapez «n».

Create Image Backup Wizard

Select Image Backup Type

You can select type of data you want to back up.

Select what you want to back up:

- My Computer
- My Data

Description

When you select this option you can create an image of the entire disc or its partitions. Backing up the entire system disc (creating a disc image) takes significant disc space, but enables you to restore the system in minutes in case of severe data damages or hardware failure.

Create Image Backup Wizard

Partitions Selection

You can create an image of selected partitions or an entire hard disc drive.

Please select the partitions or entire hard disc drives:

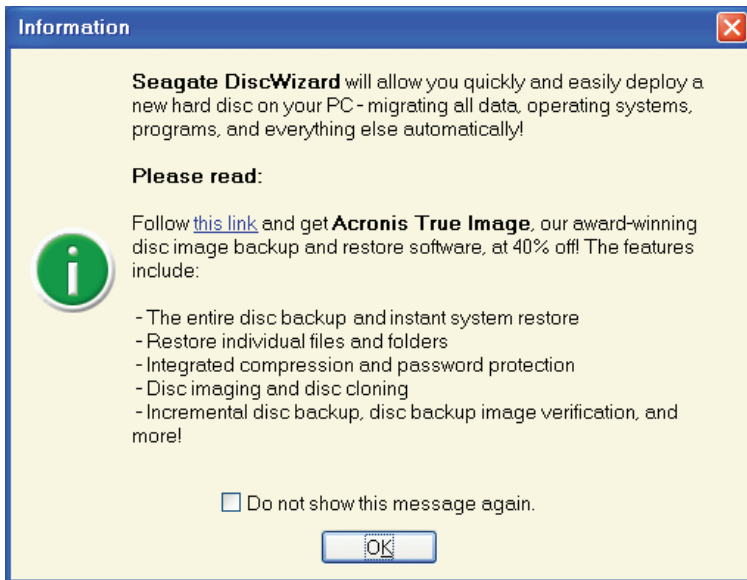

Partition	Flags	Capacity	Used Space	Type
<input checked="" type="checkbox"/> Disc 1				
<input checked="" type="checkbox"/> NTFS (C:)	Pri,Act	25 GB	3.426 GB	NTFS
<input type="checkbox"/> Disc 2				
<input type="checkbox"/> docs&apps (D:)	Pri	9.997 GB	53.94 MB	NTFS

Create an image using the sector-by-sector approach

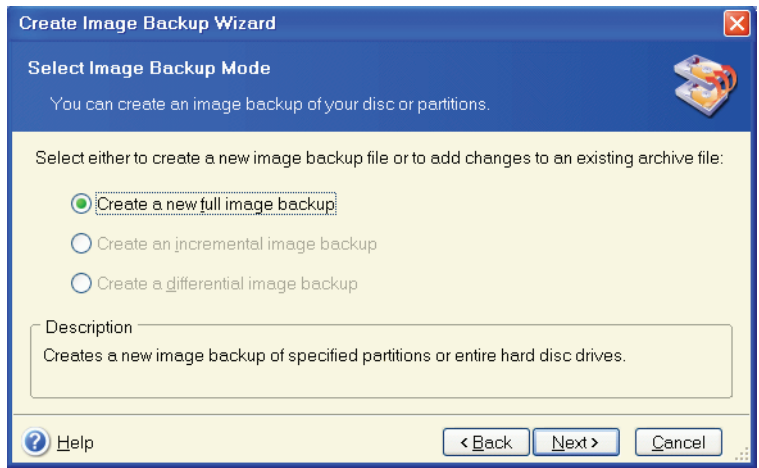

Total size: 3.426 GB

Maintenez «alt» appuyé et tapez «n». Les lettres soulignées sont accessibles avec la touche «alt». Par exemple «alt» + «n» pour «Next».

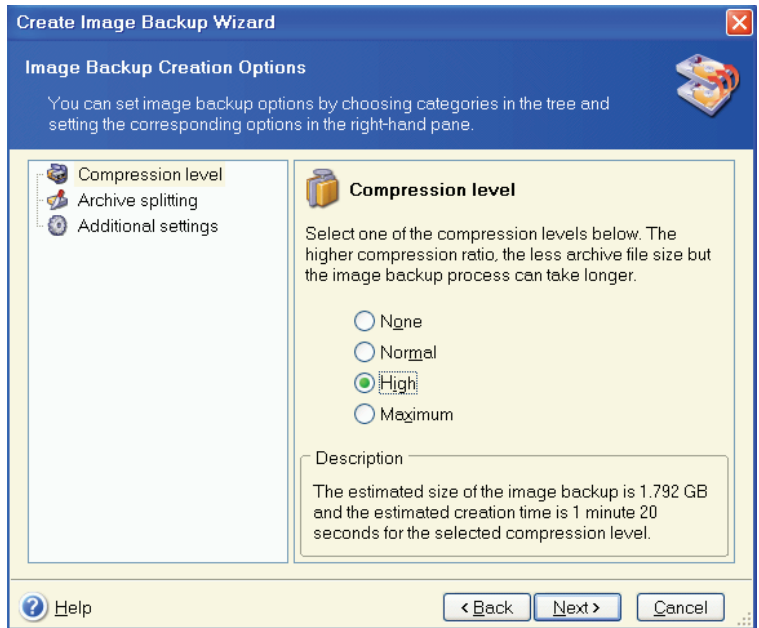

Maintenez «alt» appuyé et tapez «K».

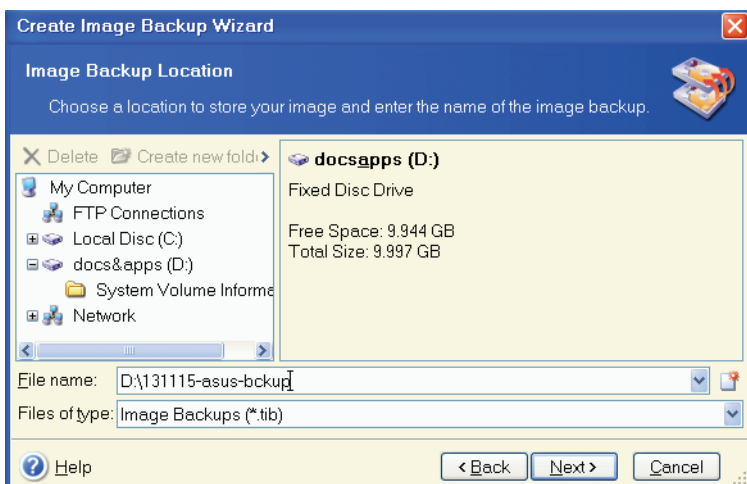

Maintenez «alt» appuyé et tapez «n».

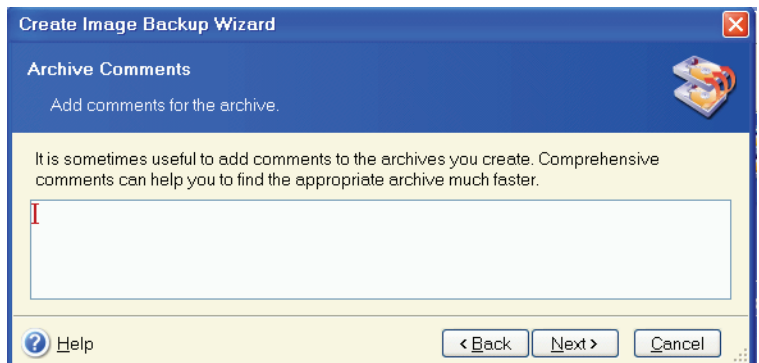

Avec la touche «tab» évoluez dans les différentes parties de la fenêtre, puis (quand vous êtes dans la partie gauche) avec la flèche vers le bas, sélectionnez la partition «D:».

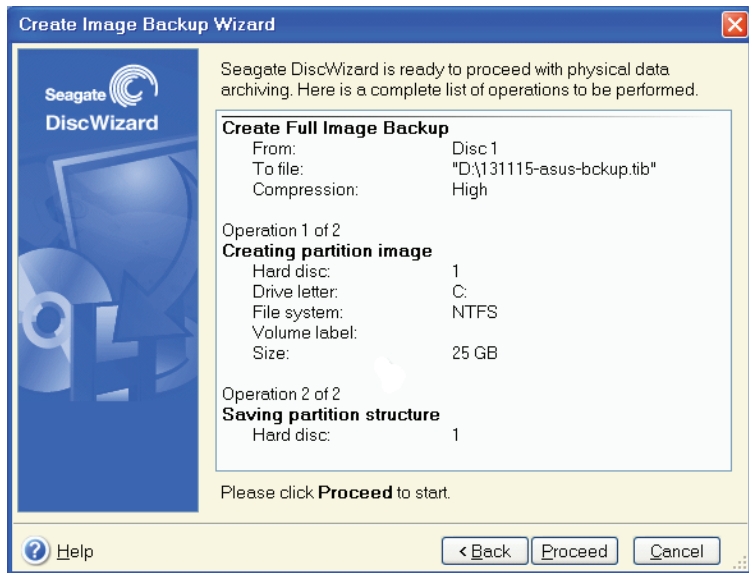

Tapez «tab», puis 3 fois flèche-bas, puis la barre d'espace, pour sélectionner la compression. Tapez «alt» + «n».

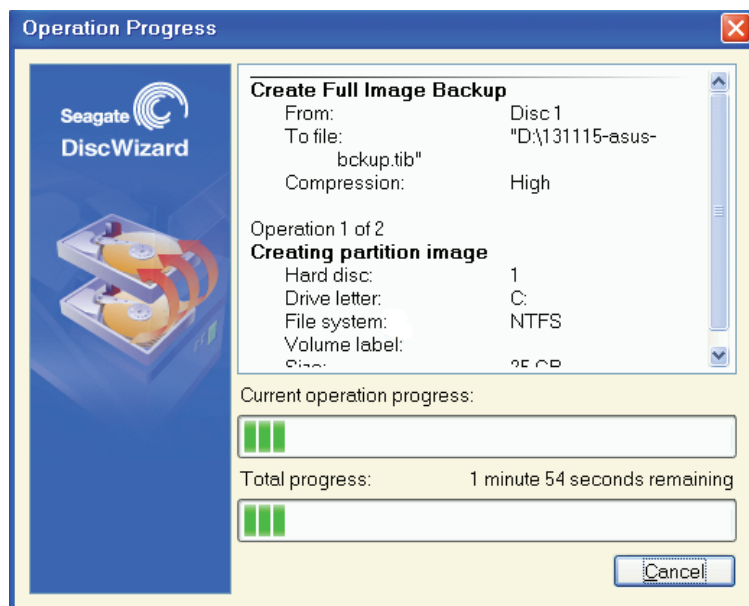

Tapez «tab», puis flèche-droite pour aller à la fin de la ligne du champ «file name». Tapez le nom du backup. Par exemple 131115(année-mois-jour) + le nom de l'ordi + bckup. Maintenez «alt» appuyé et tapez «n».

Tapez «alt» + «n».

Alt-P pour «Proceed».

...

alt-k pour ok.

Retirez le CD du lecteur. Redémarrez l'ordi avec le bouton reset sur le boîtier. Si il n'y a pas de bouton reset vous pouvez aussi maintenir le bouton d'allumage appuyé jusqu'à ce qu'il s'éteigne, puis ré-appuyer pour l'allumer à nouveau.
